Weekly procurement brief

Sonar Bangla Apparel Demo d19ac4c6 - 2026-10-16 to 2026-10-23

Highlights

- Processed 134 total inventory movements across the supply chain network for Sonar Bangla Apparel (Tenant: d19ac4c6) during the period of 2026-10-16 to 2026-10-23.
- Received 3,852 units of inventory against a total consumption of 3,627 units, resulting in a positive net inventory flow for the week.
- Active procurement operations involved 126 purchase orders carrying a total cumulative value of $7,480,240.
- Top consumed items were led by Plastic Button 18L (696 units) and Recycled Polybag (522 units), aligning with baseline apparel production runs.
- Generated 69 demand forecasts to support ongoing inventory planning and replenishment cycles.

Risks & alerts

- Zero purchase orders (0 out of 126) reached a fully received status during this reporting window, pointing to potential delays in inbound fulfillment.
- On-time delivery rate currently registers as unmeasurable (null) due to tracking limitations on completed purchase order fulfillments.
- Eight items are currently flagged within low stock status, threatening near-term production continuity if replenishment orders stall.
- One item has been identified as dead stock, tying up warehouse capacity and working capital unnecessarily.

Supplier performance

- Meghna Knit Fabrics Demo Ltd represents the largest share of procurement capital, accounting for $2,868,000 across 37 purchase orders.
- Padma Denim Demo Ltd stands as the second-highest spend partner with $1,560,000 distributed over 12 purchase orders.

- Gazipur Accessories Demo Ltd engaged with 17 purchase orders totaling $1,334,240 in spend.
- Narayanganj Thread Demo Ltd recorded $798,000 in spend across 12 purchase orders.
- Bengal Export Trims Demo Ltd accounted for $570,000 in spend through 12 purchase orders.

Recommendations for next week

- Conduct an immediate audit of open purchase orders to determine why zero orders reached full receipt during the current period.
- Prioritize expedited inbound shipments for the 8 SKUs currently flagged under low stock alerts to prevent production line stoppages.
- Review supplier delivery schedules with top-spend partners, specifically Meghna Knit Fabrics Demo Ltd and Padma Denim Demo Ltd, to establish baseline on-time delivery metrics.
- Initiate a liquidation or utilization review for the single dead stock item identified in inventory to reclaim storage footprint.
- Cross-reference the 69 newly generated demand forecasts against current supplier lead times to adjust safety stock thresholds.
